

1. Fill the following template and send it over to your point of contact.

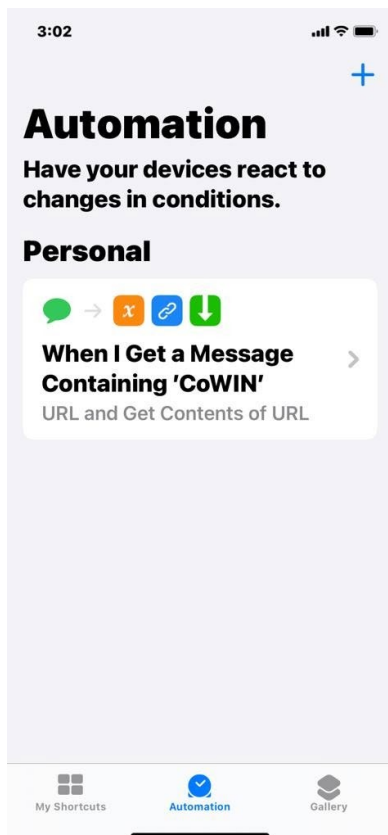

Values in **YELLOW** are Mandatory

Phone	Valid, numeric phone number that will receive OTP
State	The state to filter upon
District	The district to filter upon
Age	Only 2 values, either "18" or "45"
Name	Exact character matched name, that is there on the schedule page. This can be multiple names, separated by a comma. Add the value "All" if you want to book all under a particular number. PLEASE NOTE: The candidates scheduled should have the same age, that is either 18 or 45. You cannot mix and match 18+ with 45+ and different dosage types.
Covishield	Whether to filter on Covishield
Covaxin	Whether to filter on Covaxin
Paid	Whether to filter on Paid
Free	Whether to filter on Free
Hospital	A part of the hospital name, for example, "Nanavati" or "Kokilaben", could be multiple hospitals
Pin	The pin code to filter by. Could be multiple PIN codes separated by a comma.
Slot	The time slot to book at. Numerical value between 1 and 4. 1 corresponds to 9am to 11am, 2 corresponds to 11am to 1pm, 3 corresponds to 1pm to 3pm and 4 corresponds to 3pm to 5pm
Dose	The dose number. Has to be either 1 or 2. Defaults to 1.
Device	Your mobile device, whether it is "iOS" or "Android"

2. Go to your iOS device, and head over to “shortcuts”

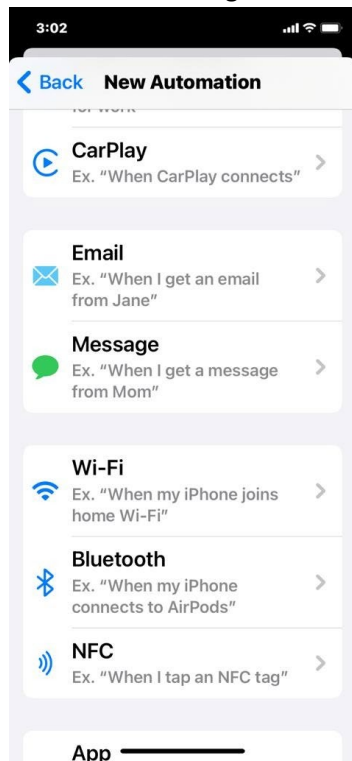

3. Head over to “Automation” and hit the “+” symbol.

5. Hit "Create Personal Automation"

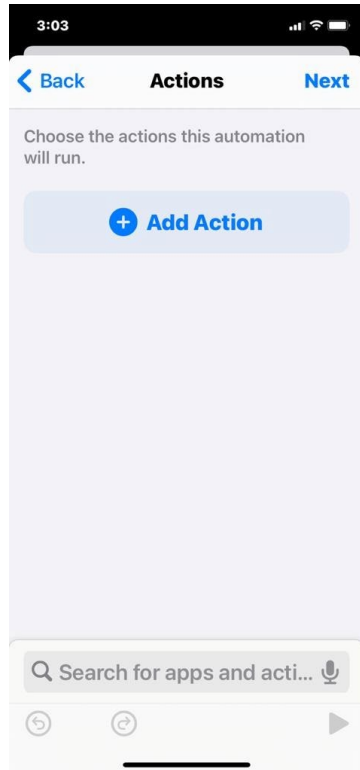

6. Search for "Message" and hit "Message"

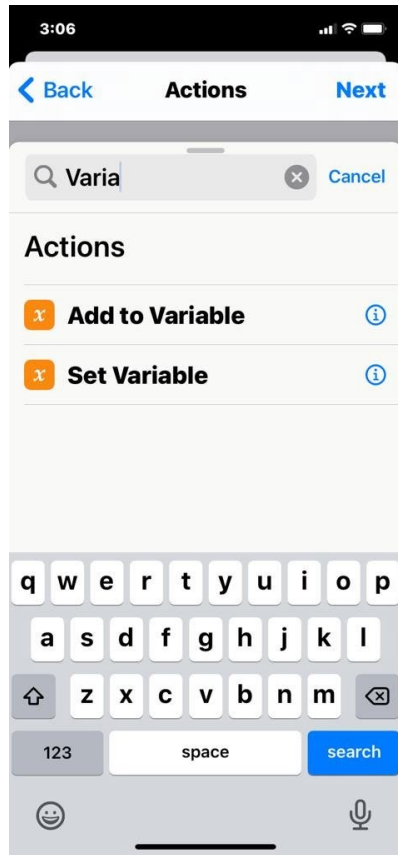

- Put "CoWIN" as "Message Contains"

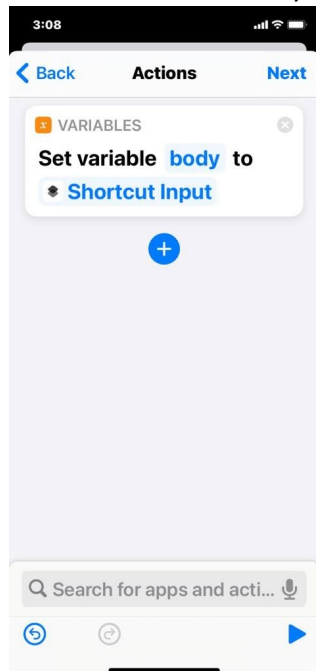

- Hit "next" and tap "Add Action"

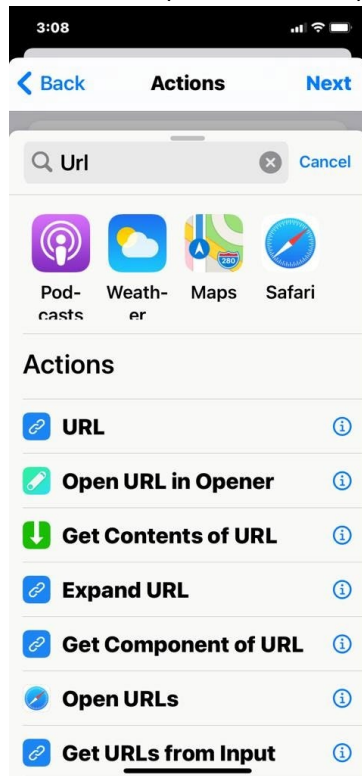

9. Search for “Variable” and hit “Set Variable”

10. Set the variable to “body” and the Input as “Shortcut Input”

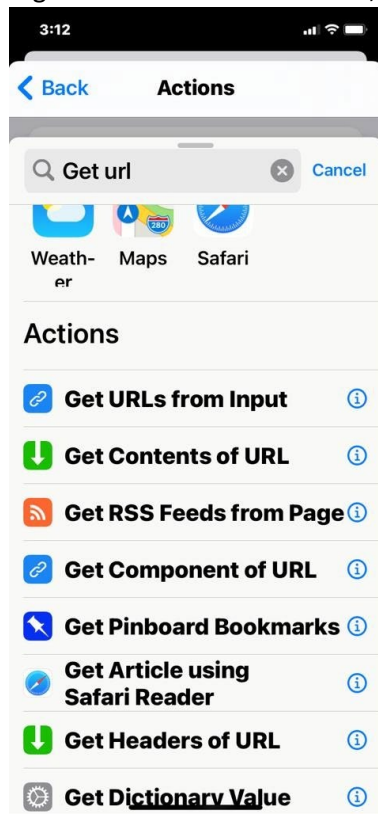

11. Hit the “+” button (below the “Variables” in the above screenshot) and search for URL, and select “URL” (The one in blue)

12. Add the IP address, followed by port as 1337/PHONE_NUMBER. The IP is 13.235.132.39, and your phone number is 1234567890, then put,
“http://13.235.132.39:1337/1234567890”
(IGNORE THE IP IN THE SCREENSHOT AND USE THE ONE ABOVE!!!!!!)

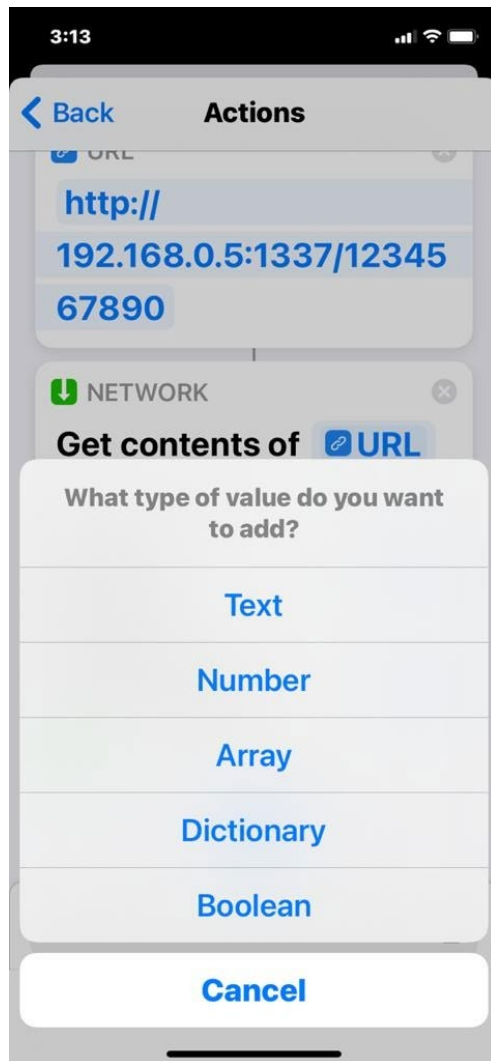

13. Again hit the small “+” button, search for “Get Contents of URL” and tap that

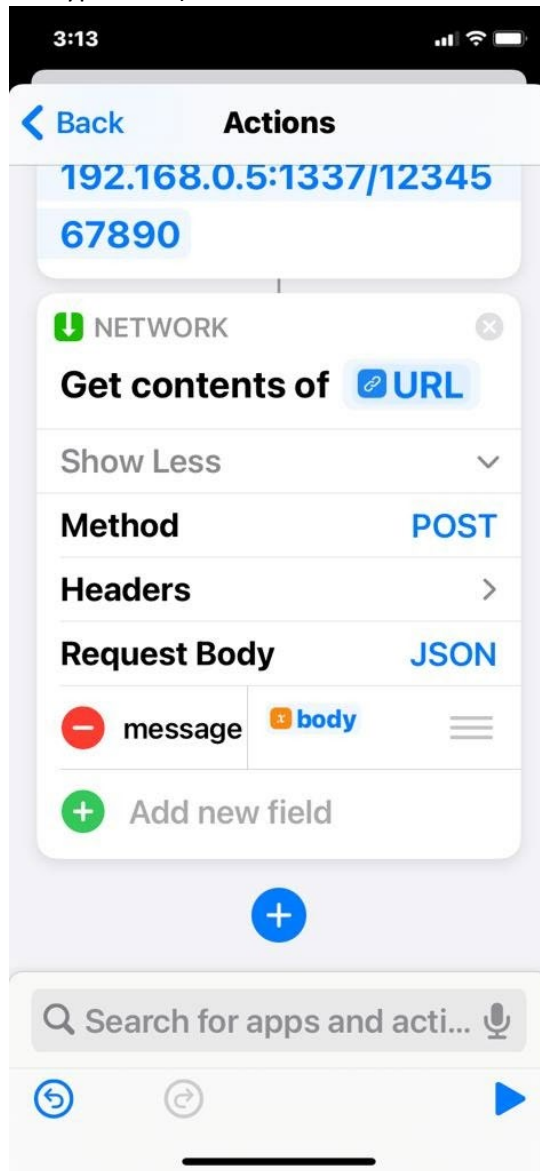

14. Set the method to “POST” and request body to “JSON”

15. Click "Add a new Field" and select "Text"

16. Put the key as “message” and value as “body” variable (The keyboard will hint you this, do not type it out)

17. Press enter on the console window after this setup.
18. On the iOS, once you get the OTP, you'll be prompted to "Run" shortcut, hit that.
